Dear Microsoft Student Partner,

As you are our ambassador to our Microsoft programs in your university, I thought that this might be of interest to you. Recently - Pakistan has joined the league of some of the top countries of the world by providing a **Certification from Home Platform** for Microsoft Certifications for its students. **I am glad to share with you that HEC has decided to extend 250 FREE\* exams to your university.** It's a major step not only for bridging the gap between education and employability, but also for helping students acquire professional skills while they have more time during this Covid period.

Microsoft and HEC have been working together in a strategic partnership over the last decade to promote the use of information technology in the Higher Education sector. The partnership covers all public and private sector universities in the country, with multiple programs aimed at upskilling the youth and providing them with multiple platforms which can be used to help build up their capacity and showcase their technical potential at a global level.

Under this strategic partnership, a certification platform has been launched to provide students with a prescribed curriculum roadmap, a kind of a blueprint for technology skill development and certification. Specific areas of study include Productivity, Computer Science, Data Science, and IT Infrastructure. The offered Certifications of **MTA** (Microsoft Technology Associate) and **MOS** (Microsoft Office Specialist) provide useful credentials for individuals seeking to validate their skills and advance their careers. The exams covered include all the productivity tools under Office 365, and also cover tech intensive certification paths, such as Cloud Fundamental courses covering Azure Fundamentals, Dynamics 365 Fundamentals and Microsoft 365 Fundamentals.

Many students have found that they have more time at hand during the long COVID-19 break, which can give them the space to focus on developing marketable skills in addition to theoretical knowledge. To support such students, HEC plans to introduce the **Certification from Home Platform** initiative for students across Pakistan. Under this initiative, you are required to share with us the confirmed list of students from your university who want to take these free Microsoft Certification Exams under HEC's umbrella. The students can conveniently select the technology area of their choice and not only learn at home with in-depth tutorials and self-study videos but also take the Exam online from the comfort of their home.

Deadline: **Sunday 13<sup>th</sup> December, 2020**
